**Examiner's Comment**

1. The applicant had correctly incorporated previously objected to limitations into claim 16, & claim 30 respectively in the after final amendment. Claim 46 in the after final amendment did not have all of the limitation associated with the dependent claim 18; consequently, the after final amendment was not in condition for allowance. In an interview after final the applicant's representative agreed to the examiner's amendment resolving this issue.

**Examiner's Amendment**

2. Referring to claim 46, add the following claim limitation wording "computing the age of said second registration message by " after "wherein validating said time stamp into said second registration message comprises: " and before "computing a time difference between said time stamp in said second registration message and a time stamp in said first registration message" so the revised claim limitation will now read "wherein validating said time stamp into said second registration message comprises: computing the age of said second registration message by computing a time difference between said time stamp in said second registration message and a time stamp in said first registration message" .
